

Swiss Global Change Day: Poster session with awards

The target of the award is to encourage the production of posters that are not only of high quality with regard to the scientific content but also concerning the representation of the results. The following list is based on established criteria in international research. They serve the participants as guidelines and enable the jury members a fair assessment of the posters submitted.

Criteria for the poster evaluation

Design / Concept:

- Is the poster eye-catching?
- Are the structures and optical elements helpful in guiding you through the poster?

Content / Elements:

- Is the content relevant? (novelty, originality)
- Are the following elements immediately visible?
 - Research questions / Hypothesis
 - Research methods
 - State of research
 - Results (preliminary) / conclusion

Text:

- Is the text inviting to read and easily readable?
- Is the text well compressed to the essential?
- Is the language of the introduction and the conclusion simple and clear?

Figures / Graphs:

- Are the figures and graphs attractive and clear?
- Are the legends helpful?
